

Are you using LeadMaster CRM
but still dialing with your fingers?

...and...

When an inbound call comes in, are
you scrambling to look up the caller?

LeadMaster Voice is your solution for Inbound & Outbound Calling

Save time and energy and land more sales!

LeadMaster Voice is an add-on tool for LeadMaster CRM with the following:

- **SoftPhone**
- **Click Dialer**
- **Voicemail Drops**
- **Inbound Call Screen Pops**

Includes:

- **TRULY UNLIMITED VoIP CALLS** – A softphone with both outbound and inbound calling in the USA and Canada (with voicemail messages automatically emailed to you).
- **LOCAL or TOLL FREE NUMBER** – Your choice of either type of inbound phone number.
- **INBOUND SCREEN POPS** – When a call comes in, Caller ID is recognized and that callers' information pops up in LeadMaster CRM.
- **OUTBOUND DIALING** – Just **CLICK** to call any telephone number on your LeadMaster CRM.
- **NO DELAYS or DROPPED CALLS** – On outbound calls, you will hear live answers say "Hello" and can speak to them immediately. There will be no delays, so no one you call will have to answer your calls and say "Hello...hello?" before you come on the line. In addition, there will be no "dropped" calls.
- **CALL TRANSFERS & CONFERENCING** – Transfer or conference calls to anyone in the USA or Canada.
- **CALL RECORDING** – Record conversations on your hard drive with 1 click of your mouse or use our optional Cloud Recording Server for only \$29 per company per month.
- **VOICEMAIL DROPS** – When you reach an answering machine or voice mail, after you hear the beep, personalize your call by greeting them by name, then click to leave one of your 5 pre-recorded messages. You can either move on to another call or stay on the line while your message plays.

How It Works

Outbound Calls

Click Dialing: When you want to make a call, just **click** a telephone number icon on your LeadMaster CRM. The dialer instantly dials that number. No more dialing by hand while looking back and forth from the phone number to your telephone. A Key Pad is available with various functions to assist you.

Hear Live Answers: When someone answers your call, you hear them speak. There are no delays!

Voicemail Drops: If an answering machine or voicemail is reached, you can just click to hang up and make another call or after the greeting and beep, you have 3 choices:

- 1) Say "Hello (their name)", then click 1 of your 5 pre-recorded messages and instantly move on to make another call while your personalized message is playing. (If someone picks up the phone, you will not be there to speak to him or her.)
- 2) Say "Hello (their name)", then click 1 of your unlimited number of pre-recorded messages while you stay on the line. (If a person picks up the phone while your message is playing, you can stop the message and speak to him or her.)
- 3) Speak your live message just for that person.

Inbound Calls

Screen Pops: Whenever a call comes in, if that phone number is in your records, just click to pop up the screen with that customer or prospect's information. Then when you answer that call, you'll be able to communicate intelligently, without having to scramble to find any information about the caller.

Other Features

Record Conversations: With 1 click of your mouse, you can record your conversations onto your hard drive or you may use our optional Cloud Recording Server for only \$29 per company per month.

Transfer & Conference Calls: Click to conference other people on the call or transfer a call to another person anywhere in the USA or Canada.

Scripts: Read pop-up scripts you have created.

Call Logs: See all of your calling records.

Optional Agent Monitoring & Coaching Tool

Supervisors can Silently Monitor, Whisper Coach, Barge In, and Record their agents' conversations for a one time cost of only **\$99** (no monthly charges).

What You Need To Supply for LM Voice

Summary of Requirements To Use This Product:

- Broadband internet connection (wired is preferable to wireless)
